
DRY-MAX

DRY-MAX has created a new compound for dry extraction carpet cleaning. Our product has faster soil absorption than other compounds and the product is safe for carpet and user. We know and believe it will become your primary cleaning product. There are many products on the market, some are good, some are not—but none are better than DRY-MAX. Try DRY-MAX and you will understand the benefits. As professional cleaners for over 15 years, we understand the need to keep the price as low as possible to compete in the market.

Price

DRY-MAX offers a better product at a lower price. In fact 30% lower.

In each case of DRY-MAX, you receive 4 boxes of compound. Each box contains 14 pounds of DRY-MAX totaling 56 pounds of DRY-MAX per Case. Our competition's case contains four 12-pound boxes totaling only 48 pounds. You receive 8 pounds per case more compound with DRY-MAX. By purchasing 5 cases this would amount to almost 1 free case of dry Compound.

DRY-MAX

Dry Carpet Cleaning Compound

About Dry Carpet Cleaning

Many systems are available on the market today. Most systems are not truly dry when done. DRY-MAX is. We have designed DRY-MAX with a unique blend of cleaning agents that allow you to clean in a more wide range of soil conditions. Maintenance is always the key to long carpet life. However, as a professional cleaner you need to handle all soil conditions. We developed DRY-MAX with the environment in mind. By making it completely biodegradable it has no harsh solvents.

DRY-MAX Compound is safe for all carpets. DRY-MAX is safe for all synthetics as well as natural carpet fibers.

What is DRY-MAX

DRY-MAX compound is a highly absorbent organic compound, consisting of the finest cellulose fibers (absorbent base material) available. To this, we have added a revolutionary cleaning agent that allows the compound to breakdown and absorb the soil from the carpet fibers. This leaves no measurable detergent residue. DRY-MAX has been formulated from the highest quality ingredients.

How to use DRY-MAX?

The amount you use is dependent upon the soil condition of the carpet. Simply apply DRY-MAX to the carpet, work it through with a dual brush machine. There is no need for a pre-spray in most conditions. Work the brushes in all directions. The compound will turn lighter in color when completely dry. Depending on the amount used, this will take 20 to 40 minutes.

Why DRY-MAX?

For a long time, other higher priced manufacturers have had little competition in the market. DRY-MAX has developed a new compound that surpass all others in price as well as quality. DRY-MAX comes in a user friendly product size. When dry carpet cleaning is used on a regular basis, **carpets stay clean longer** since there is no water and soap left to attract new soil. DRY-MAX offers an unrivalled method of deep cleaning all types of carpet from Wool to Sisal safely.

DRY-MAX cost!

DRY-MAX is manufactured in Cincinnati Ohio. All shipping is from this location. Please call for exact price quotes.

Why are DRY-MAX prices so much better? We eliminate the need for distributors by allowing you to order directly from the manufacturer. No need for us to have costly distributors in each state. Call now for price quotes.
